INTRODUCTION

To bring better customer service and better spare parts supply, please note the following four points when referring to this Parts Catalog.

I. HOW TO USE THIS PARTS CATALOG

- A. The Publication Number of this Parts Catalog is C-034E. Whenever quoting the Parts Catalog, tell us this Pub. No. .
- B. All spare parts available for MODEL SP, SR311 series are included here.
- C. Alphabetical section index appears on page 28.
- D. Brief specifications of Model SP, SR311 series appear on page 3.
- E. Symbols and Abbreviations appear on page 8.
- F. The Car Numbers, the Engine Numbers or the Dates in the Part Name column indicate the application of the parts which were changed. The location of the car No. and the engine No. appears on page 10-2.
- G. Part Number Index is attached to the end of this Parts Catalog.
- H. Alphabetical Index is attached to the end of this Catalog.

**II. HOW TO PLACE YOUR ORDERS FROM THE PARTS CATALOG
(FOR DISTRIBUTOR USE ONLY)**

- A. Typewrite the spare parts which you are going to order on the given Nissan Spare Parts Order Sheet.
- B. At least the Part Numbers and the Quantity must be filled in as accurately as possible. Otherwise our computer may reject your order.
- C. In the case that you can not find the Part No. which you are going to order we shall be very glad to take care of this problem after verifying its availability. Therefore, place your order on another order sheet as a conditional order, which does not include an Ordinary order, telling us precisely the Part Name, the Place where it is attached and the Quantity - if it is a colored thing or material, attach a sample.

III. HOW TO COMPARE THE CONFIRMATION LIST AND THE PARTS CATALOG (FOR DISTRIBUTOR USE ONLY)

Although all parts contained here are in principle available for supply, if you find some parts shown in the Parts Catalog sorted F/# U on the confirmation list where the availability of your ordered parts are classified by our computer in respect to our stock control system, kindly tell us the Parts Numbers, the Pub. No. of the Parts Catalog (C-034E), and the Page. We shall be glad to inform you of the availability by the revised confirmation list as soon as possible.

IV. HOW TO ADAPT TO OUR PART NUMBER SYSTEM

In our parts supply system, the Part Number plays a key role. Therefore, you may print only the part numbers and the quantity as long as they do not cause mutual misunderstandings.

For this reason, kindly become familiar with our Part Number System which appears on page 15.

EXPLANATION OF EACH COLUMN

I. "S" column (preceding the KEY NO. column.) (DISTRIBUTOR USE ONLY)

- * Signifies that the part No. has been removed. In such a case, use the superseding part Nos. shown below.
- # The parts preceded by # mark are conditional order items. Place the order as specified in the Nissan Parts S.O.P..

II. KEY NO. column

- A KEY NO. consists of three digits.
The key numbers will be changed at each revision.

III. PART NO. column

- They are as a rule ten digits.
However, 12-digit Part Nos. may rarely appear.

IV. PART NAME column

- PART NAME column contains not only the part name but applied Car No., Engine No., or Applied date.
In the case of the annual model change, there are used the abbreviations instead of the actual car nos. For example, "(FROM OCT-67)" stands for 1968 year model and you can see the actual car no. by referring to the "Car No. and Engine No." section in the Introduction. On those pages, together with the pictures of the annual models, the abbreviations and the actual car nos. are described.
"INC" is the abbreviation of "Including".

V. Q'TY column

- The quantity in this column shows the pieces of the part used in the section.
"AR" is the abbreviation of "As Required".

VI. SALES UNIT column (DISTRIBUTOR USE ONLY)

- SALES UNIT column indicates the pieces which are contained in a packing box (i.e. bulk unit).
Accordingly, if you place the order for a part multiplying its sales unit, you will receive the part in a form easily to be stored into the bin (ex. Sales unit 10 make your order by 10, 20, 30).
The Sales Units which are not filled-in will be advised you through the Revised Sheets.

VII. "ICA" column

"ICA" is the abbreviation of Interchangeability.

..... The only modified parts carry this column.

..... These codes always show the relation between the part itself and the former part shown above.

"Y" is the abbreviation of Yes (i.e. Substitutive)

"N" is the abbreviation of No (i.e. Not substitutive)

"C" is the abbreviation of Conditional (i.e. Substitutive with condition)

In the case of "C", the details of the condition are described in the Fig.

B6

EXPLANATION OF NISSAN PARTS NUMBER SYSTEM

Our part number as a rule consists of ten digits which are made up of four factors as follows. However, in order to standardize small parts such as screws, washers, bolts, nuts and so on, which are often used on our models, we specify them as NES part according to the Nissan Engineering standard (N. E. S.).

Section No.	Character No.	Part Type No.	Distinction No.
0 0	0 0 0	- 0 0 0	0 0

1. Section No. (2 digits)

The Section No. consists of 2 digits which indicate the major function of parts.

2. Character No. (3 digits)

The Character No. consists of 3 digits which indicate minor classification in each Section as shown by the Table of Section and Character No. on page 17. The character No. of 660 or X00 signifies the assembly parts.

3. Part Type No. (3 digits)

The Part Type consists of 3 digits which in principle indicate the applied model as shown by the Table of Part Type on page 20. This means that the part is originally designed for that model. However, it may be used widely over our models. Therefore, it does not always signify the applied model.

4. Distinction No. (2 digits)

The Distinction No. consists of 2 digits which indicate the difference between similar parts as shown below.

Kinds of Distinction	Distinction No.
a. Similarity	00 - 19, 60 - 69
b. Exclusive Service Use	25 - 29, 75 - 79
c. Material	40 - 45, 80 - 85
d. Processing	30 - 39, 90 - 94 50 - 59

Note: The other Distinction Nos. are unset.

B12

a. Similarity

When parts are only slightly changed, the distinction is shown by this No..
Similar or colored parts are distinguished by this No..

For example;

74902-11400	Carpet (red)
74902-11401	Carpet (blue)
74902-11402	Carpet (brown)

b. Exclusive Service Use

Repair kits or sets which are used exclusively for service, are set by this No..

For example; 46010-10800 Brake Master Cylinder assembly
46010-10825 Repair kit

c. Material

The difference of materials is distinguished by this No..

d. Processing

For the convenience of our production line process, in the case we can not supply by the original part No., the sub-assembly is supplied by this No..

For example;

20132-08750	Clamp sub-assembly
	Components
20132-08700	Clamp-lower
20133-08700	Clamp-upper
1-14520-1	Bolt
9-15115-1	Washer

Except those numerical part numbers, there are the part numbers beginning with letters.

They are the part numbers exclusively reserved for service use.
